A CRM APPLICATION FOR THECHAISHOP&CO

A CRM APPLICATION FOR

THECHAISHOP&CO

User Story:
As a sales representative at TheChaiShop&Co, I want to efficiently manage customer relationships and streamline sales processes using our CRM application.
I want to easily access and update employer details, as well as distinguish between online and offline customer records using record types, allowing for personalized interactions.
Additionally, I need the application to automate sales calculations, such as order quantity and total bill amount, to ensure accurate and efficient transactions.
Moreover, I require the ability to generate insightful reports and dashboards to summarize and analyze sales data effectively, aiding in decision-making and strategy development.
Lastly, I would like the application to automate email notifications to customers on their birthdays, informing them of special offers tailored to celebrate their special day, enhancing customer engagement and loyalty.

1. INTRODUCTION

1.1 Project Overview :
The project “A CRM Application for TheChaiShop&Co” focuses on developing a Salesforce-based Customer Relationship Management (CRM) system to manage customer, employer, and enterprise accounts efficiently. The system automates sales processes, maintains customer records, generates reports, and improves customer engagement through automated notifications.
The project user story and objectives are defined in the initial section of the document

1.2 Purpose :
The purpose of this project is to:
- Streamline customer relationship management
- Automate billing and order calculations
- Improve data accuracy
- Enable data-driven decision-making
- Enhance customer engagement through email automation

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

CamScanner

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Sales Representative	Manage customer orders and billing	Calculations are often incorrect	Order quantity and billing are manual	Stressed and inefficient
PS-2	Store Manager	Monitor sales and customer records	Reports are delayed and incomplete	Data is stored in multiple files	Confused and dissatisfied
PS-3	Customer	Receive personalized offers and updates	I do not get timely notifications	There is no automated communication	Disconnected and undervalued

Gain Automation, fast reports

2.3 Brainstorming

Brainstormed Ideas

CamScanner

● Manual CRM system
● Excel-based management
● Web-based CRM

Selected Idea:

Salesforce-based CRM Application for TheChaiShop&Co..

● Salesforce-based CRM
● Automated email system

Selected Idea:

Salesforce-based CRM Application for TheChaiShop&Co..

3.REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map

Journey Stages:

● Login
● Access CRM Application
● Enter Customer Data

CamScanner

- Generate Orders
- Calculate Bills
- View Reports
- Decision Making

3.2 Solution Requirements

Functional Requirements

FR No Requirement

FR-1 User Login
FR-2 Object Creation
FR-3 Data Entry
FR-4 Billing Automation
FR-5 Report Generation
FR-6 Email Automation

Non-Functional Requirements

NFR-1: Usability
The system should be easy to use for sales representatives, managers, administrators, and analysts without requiring technical training.
Requirements :

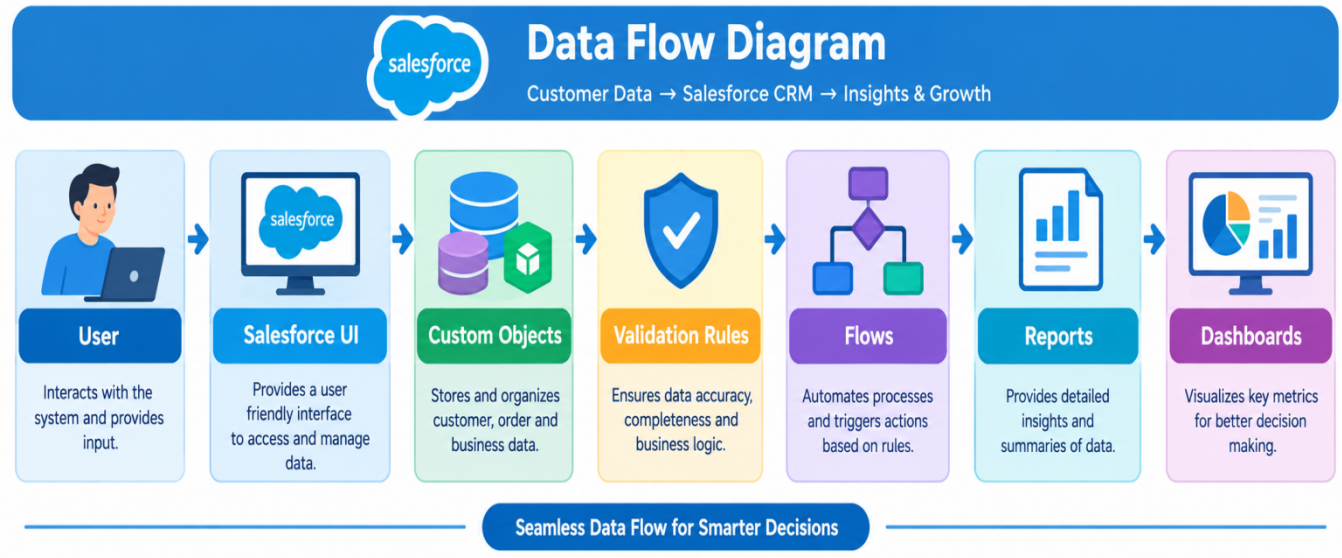

- Simple and intuitive user interface

CamScanner

● Clear navigation menus
● Easy-to-understand form● User-friendly dashboards
Example:
A new sales employee should be able to log in, enter customer details, and generate orders within a few minutes without help.
Salesforce Lightning UI provides drag-and-drop features and easy navigation.
NFR-2: Security
The system must protect customer and business data from unauthorized access.
Requirements:
● Role-based access control
● Secure login authentication
● Encrypted data storage
● Data backup and recovery
Examples:
● Profiles and permission sets
● Object-level and field-level security
● Restricted billing access
● Secure login and password policies
NFR-3: Reliability
The CRM system should work correctly at all times and store data accurately without loss.
Requirements:
● Automatic data saving
● Regular system backups
● Error handling mechanisms
● Stable cloud environment
Example :
If a user enters order data and the internet disconnects, the system should save the information and restore it later.
Salesforce cloud ensures automatic backups.
NFR-4: Performance
The system should respond quickly and handle large amounts of data efficiently.
Requirements:
● Fast page loading
● Quick report generation
● Smooth dashboard rendering
● Minimal delay
Example: When a manager generates monthly sales reports for hundreds of customers, the report should load within 2–3 seconds.
Optimized queries and caching improve speed.
NFR-5: Availability
The system should be accessible whenever required.
Requirements:
● 24/7 system availability
● Minimal downtime

CamScanner

● Cloud-based hosting
● Disaster recovery
Example: Managers should be able to access the CRM system during peak business hours, weekends, or late nights.
Salesforce cloud provides high uptime.
NFR-6: Scalability
The system should support business growth without affecting performance.
Requirements:
● Ability to handle more users
● Support increasing customer data
● Expandable storage
● Maintain system speed
Example: If TheChaiShop&Co expands to multiple branches, the CRM system should support thousands of customers without slowing down.
Salesforce infrastructure automatically scales.

4. PROJECT DESIGN PHASE

4.1 Problem–Solution Fit

The CRM system replaces manual records with automated data management. Cloud storage prevents data loss, dashboards improve analysis, and real-time reports eliminate delays. This ensures accurate and timely business insights generation

4.2 Proposed Solution

Functional Requiremennt

Parameter Description

User Login & Allows authorized users to securely log in to the CRM system
Authentication using valid credentials.

Customer Record Enables users to create, view, update, and delete customer details
Management such as name, contact number, and address.

Employer & Allows management of employer and enterprise account
Enterprise information for business operations.
Management

Order Management Supports creation and tracking of customer orders, including order quantity and product details.

Automated Billing Automatically calculates total bill amount using formula fields
System based on order quantity and pricing.

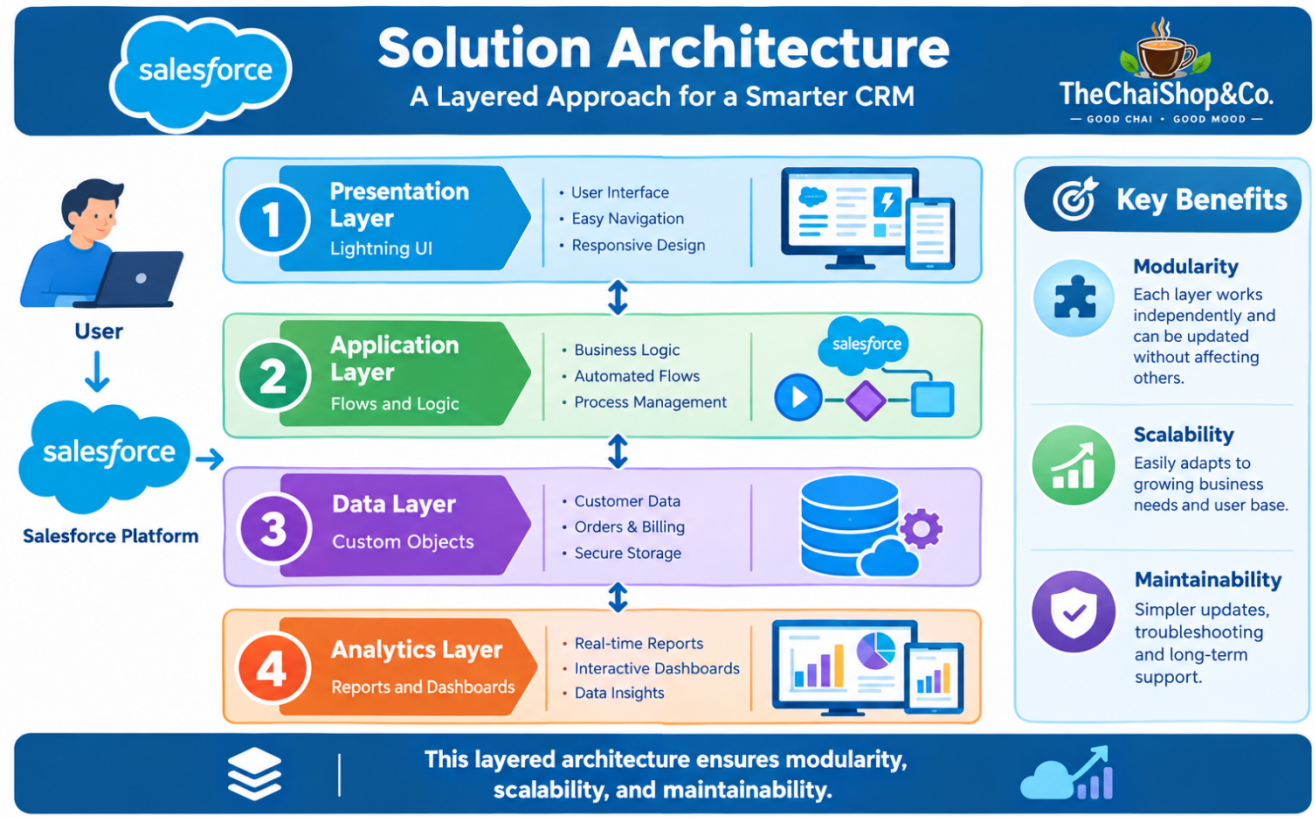

Validation Rules Ensures accurate data entry by validating fields such as phone number, PAN, and Aadhaar.

Record Types & Provides different record types and layouts for various customer
Page Layouts and enterprise categories.

CamScanner

Global Picklists Maintains standardized values for fields such as product type, category, and status.
Email Notification Sends automated emails to customers for birthdays, offers, and System order confirmations.
Workflow & Flow Automates tasks such as updating records and triggering alerts Automation using Salesforce Flows.
Report Generation Generates detailed reports on sales, customers, and enterprise performance.
Dashboard Displays real-time analytics through interactive dashboards and Visualization charts.
Data Backup & Ensures secure storage and recovery of business data in the Recovery Salesforce cloud.
User Role Controls system access using profiles and permission sets for Management different users.

4.3 Solution Architecture
Architecture Layers
1. Presentation Layer – Lightning UI
2. Application Layer – Flows and Logic
3. Data Layer – Custom Objects
4. Analytics Layer – Reports and Dashboards
This layered architecture ensures modularity, scalability, and maintainability.

CamScanner

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

● The project followed an Agile-based development approach with defined milestones and sprints.
● A Salesforce Developer account was created to set up the development environment.
● Custom objects were designed to store customer, employer, and enterprise data.
● Custom tabs and a Lightning Application were developed for easy system navigation.
● Fields, relationships, and global picklists were configured to ensure data consistency.
● Page layouts and record types were created based on user roles and customer categories.
● Validation rules were implemented to prevent incorrect data entry.
● Email templates and automated flows were developed for customer notifications.
● Reports and dashboards were created for performance monitoring and analysis.
● Regular sprint reviews and testing were conducted to track progress and resolve issues.
● The project was completed within the planned timeline through systematic scheduling.

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Member
Sprint-1	Developer Setup	USN-1	As an admin, I want to create a Salesforce developer account so that I can configure and deploy the TheChaiShop&Co CRM application.	1	High	Member1
Sprint-1	Data Modeling	USN-2	As an admin, I want to create Customer, Employer, and Enterprise objects so that business data can be stored and managed systematically.	3	High	Member2
Sprint-2	Data Modeling	USN-3	As a user, I want separate tabs for each object so that I can easily navigate and manage CRM records within the application.	3	High	Member3

CamScanner

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Member
Sprint-2	Data Modeling	USN-4	As a manager, I want a dedicated Lightning App so that all CRM operations are accessible from a single dashboard.	3	High	Member4
Sprint-2	Data Modeling	USN-5	As an admin, I want to create customer and order fields so that complete sales and billing details can be captured accurately.	5	Medium	Member1
Sprint-2	Data Modeling	USN-6	As a user, I want customized page layouts for different record types so that only relevant information is displayed during data entry	5	High	Member2
Sprint-2	Data Modeling	USN-7	As a manager, I want separate record types for Retail and Enterprise customers so that different business categories can be managed efficiently.	5	Medium	Member3
Sprint-3	Automation	USN-8	As a system, I want to validate customer details and order inputs so that incorrect data entries are prevented.	3	High	Member4
Sprint-3	Automation	USN-9	As a system, I want automated flows to send email notifications so that customers receive timely updates and offers.	5	High	Member1
Sprint-4	Automation	USN-10	As a system, I want to automatically calculate billing amounts so that invoices are generated without manual effort.	5	High	Member2
Sprint-5	Reports	USN-11	As a manager, I want sales and customer reports so that I can monitor business performance and make informed decisions.	4	High	Member3
Sprint-6	Dashboards	USN-12	As a manager, I want visual dashboards so that I can quickly analyze sales, customers, and enterprise performance.	4	Medium	Member4

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on	Sprint Release Date (Actual)

CamScanner

Date)
Sprint-1 20 6 Days 24 Oct 2022 29 Oct 2022 20 29 Oct 2022
Sprint-2 20 6 Days 31 Oct 2022 05 Nov 2022
Sprint-3 20 6 Days 07 Nov 2022 12 Nov 2022
Sprint-4 20 6 Days 14 Nov 2022 19 Nov 2022
6. Project Development Phase:
Project Flow

Milestone 1 : Creation of developer account

Milestone 2 : Object Creation

Milestone 3 : Tabs

Milestone 4 : The Lightning App

Milestone 5 : Global Picklist

Milestone 6 : Fields and Relationships

Milestone 7 : Creation of Page Layout

Milestone 8 : Creation of Record Types

Milestone 9 : Validation rules

Milestone 10 : Email Templates

Milestone 11 : Flows

Milestone 12 : Reports and Dashboards

Milestone 13 : Conclusion

What you'll learn
1. Real Time Salesforce Project

2. Standard and Custom objects
3. Picklist Value sets
4. Types of Fields & their relationships.
5. Page Layouts
6. Record Types
7. Validation Rules
8. Email Templates
9. Flows
10. Reports and Dashboards.

Implementation

Milestone 1 - Salesforce developer account creation :

Activity 1: Creating Developer Account:

Creating a developer org in salesforce.

1. Go to https://developer.salesforce.com/signup
2. On the sign up form, enter the following details :

1) First name & Last name
2) Email
3) Role : Developer
4) Company : College or Company Name
5) County : India
6) Postal Code : pin code
7) Username : should be a combination of your name and company

This need not be an actual email id, you can give anything in that format : username@organization.com

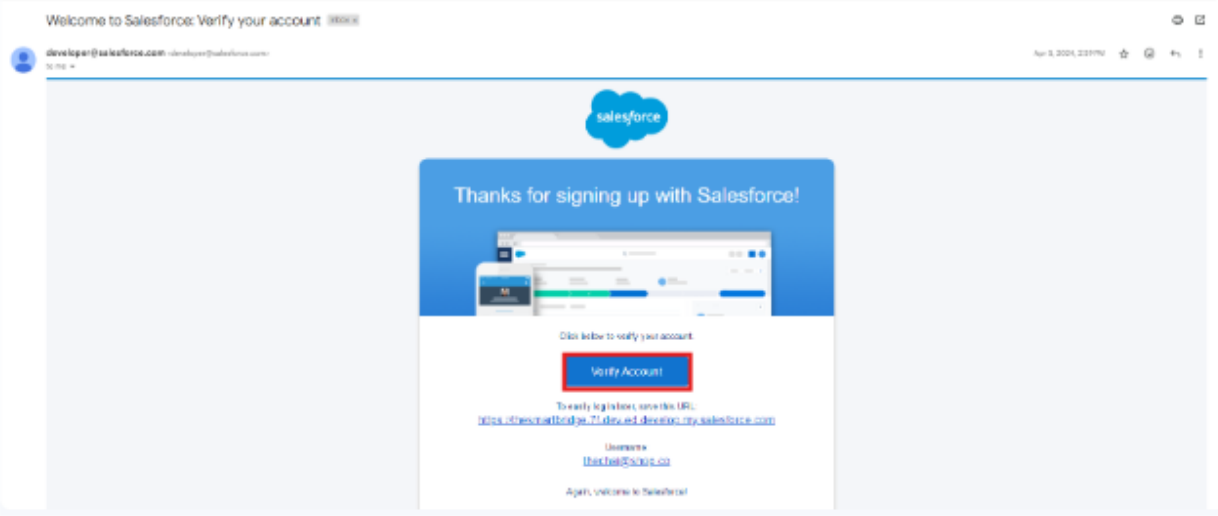

Click on sign me up after filling these.

Activity 2: Account Activation :

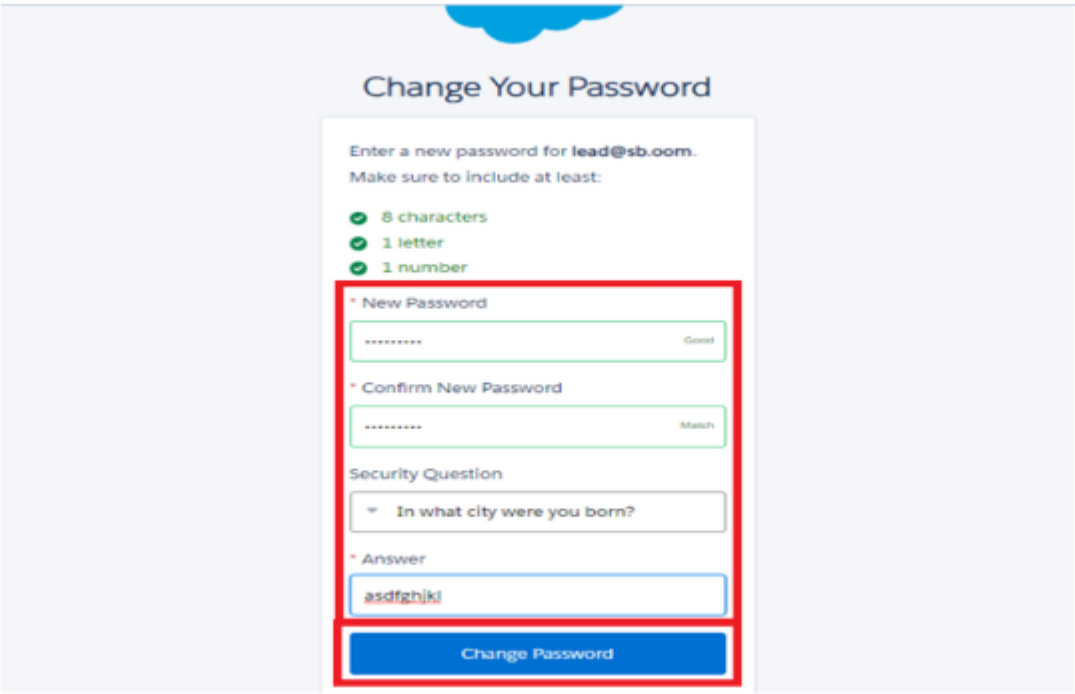

1. Go to the inbox of the email that you used while signing up. Click on the verify

account to activate your account. The email may take 5-10mins.

CamScanner

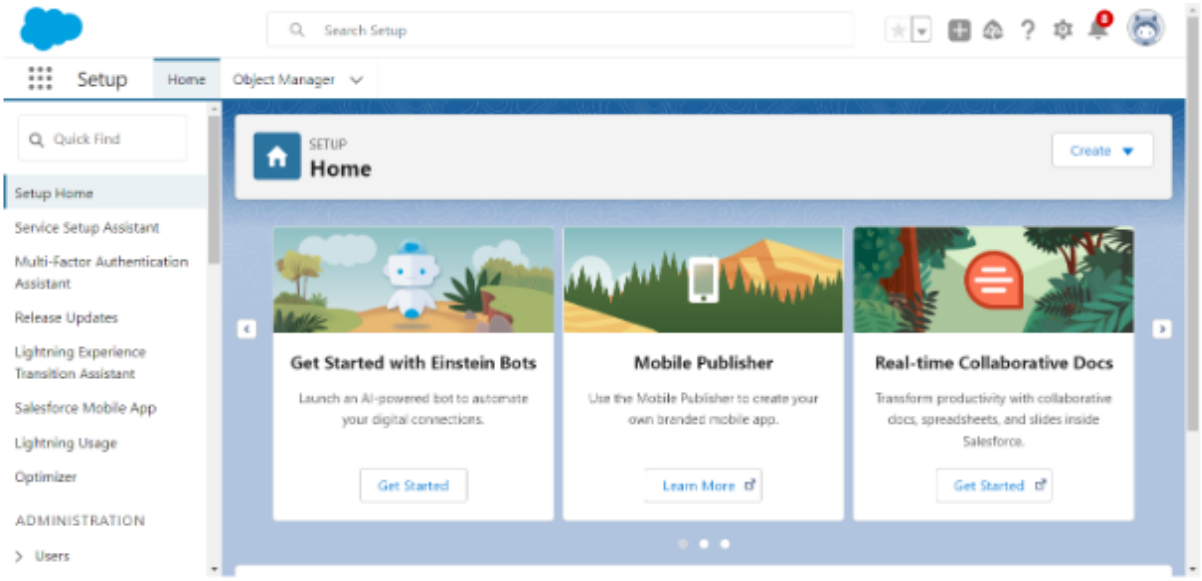

2. Click on Verify Account.
3. Give a password and answer a security question and click on change password.

4. Then you will redirect to your salesforce setup page

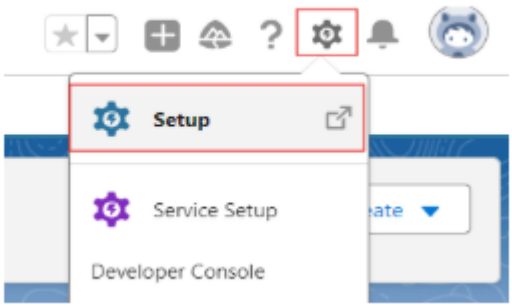

CamScanner

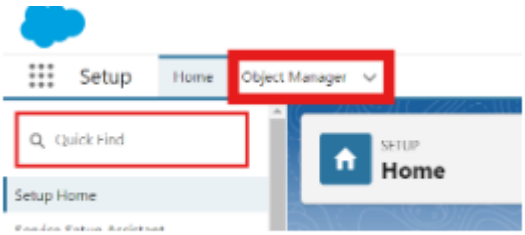

.

Milestone 2 - Objects

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.

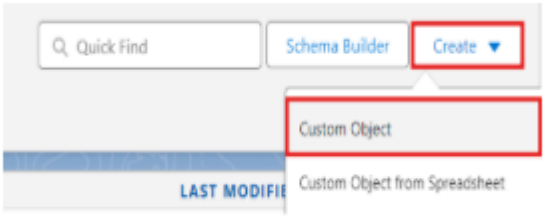

2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.

CamScanner

3. On the Object Manager page, click Create | Custom Object.

Activity 1 : Employer Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.
● Label : Employer Account
● Plural Label : Employer Accounts
● Enter Record Name Label and Format
Record Name : Employer Account Name
Data Type : Text
● In Optional features : check the boxes for Allow Reports | Allow Activities | Track Field History.
● Search Status : check the box for Allow Search.
● Save

Activity 2 : Customer Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.
● Label : Customer Account
● Plural Label : Customer Accounts
● Enter Record Name Label and Format
Record Name : Customer Account Name
Data Type : Text
● In Optional features : check the boxes for Allow Reports | Allow Activities | Track Field History.
● Search Status : check the box for Allow Search.
● Save

Activity 3 : Enterprise Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.
● Label : Enterprise Account
● Plural Label : Enterprise Accounts
● Enter Record Name Label and Format
Record Name : Enterprise Account Name
Data Type : Text
● In Optional features : check the boxes for Allow Reports | Allow Activities | Track Field History.

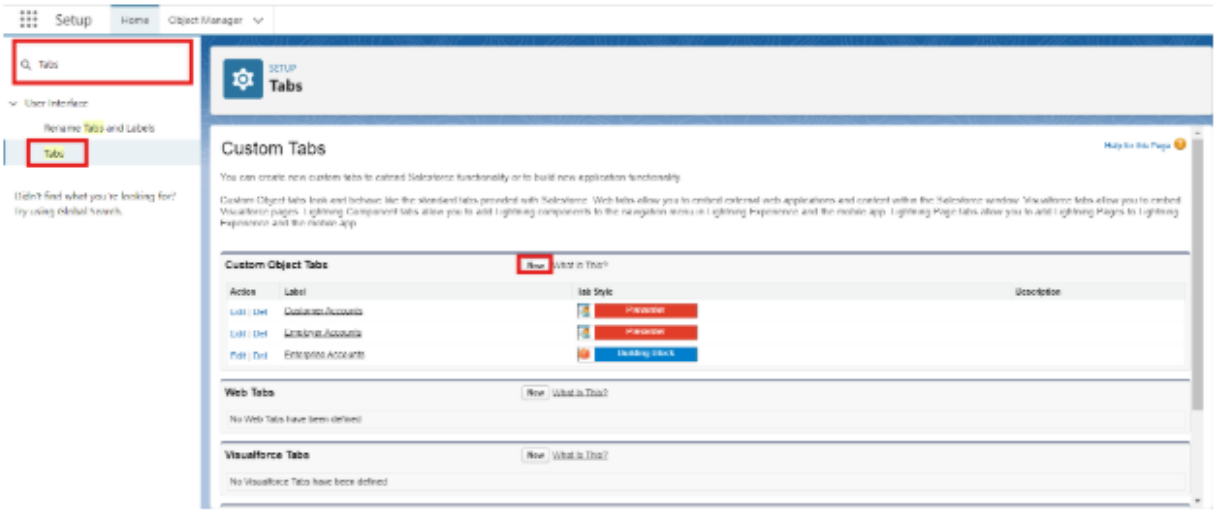

CamScanner

● Search Status : check the box for Allow Search.
● Save

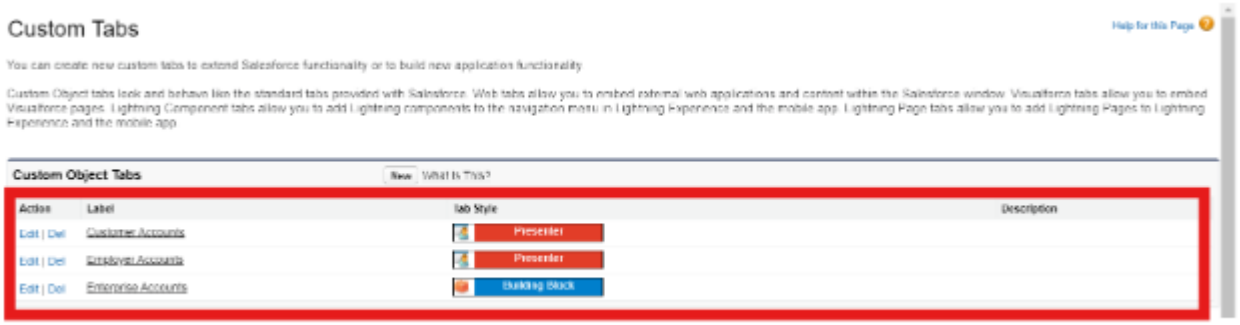

Milestone 3 - Tabs

Activity 1 : Custom tabs creation

1. Go to setup page → type Tabs in Quick Find bar → click on tabs → New (under custom object tab)

2. Select Object(Employer Accounts) → Select the tab style → Next (Add to profiles page) keep it as default → Next (Add to Custom App) uncheck the include tab .
3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save.
5. Repeat the same steps for Customer Accounts and Enterprise Accounts.

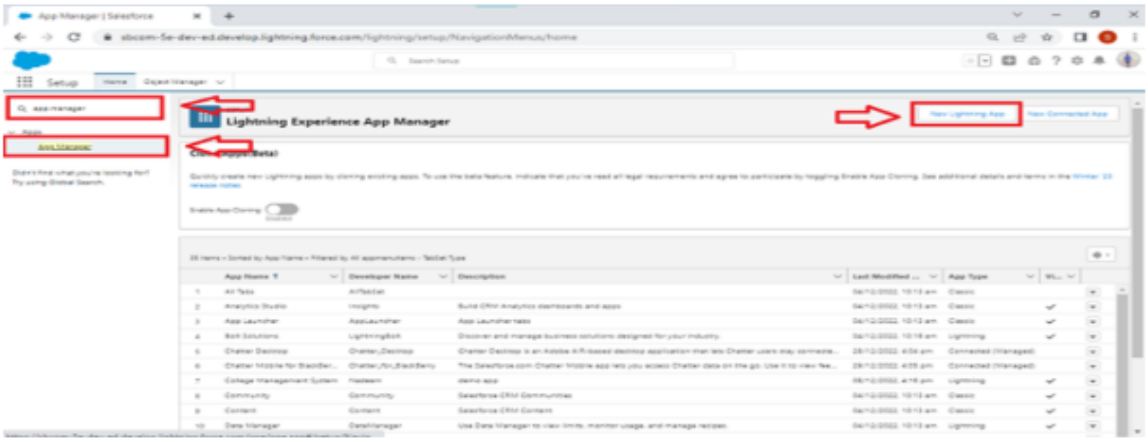

Milestone 4 - The Lightning App

Activity 1 : Create a lightning app

1. Go to setup page → search “app manager” in quick find → select “app manager” → click on New lightning App.

CamScanner

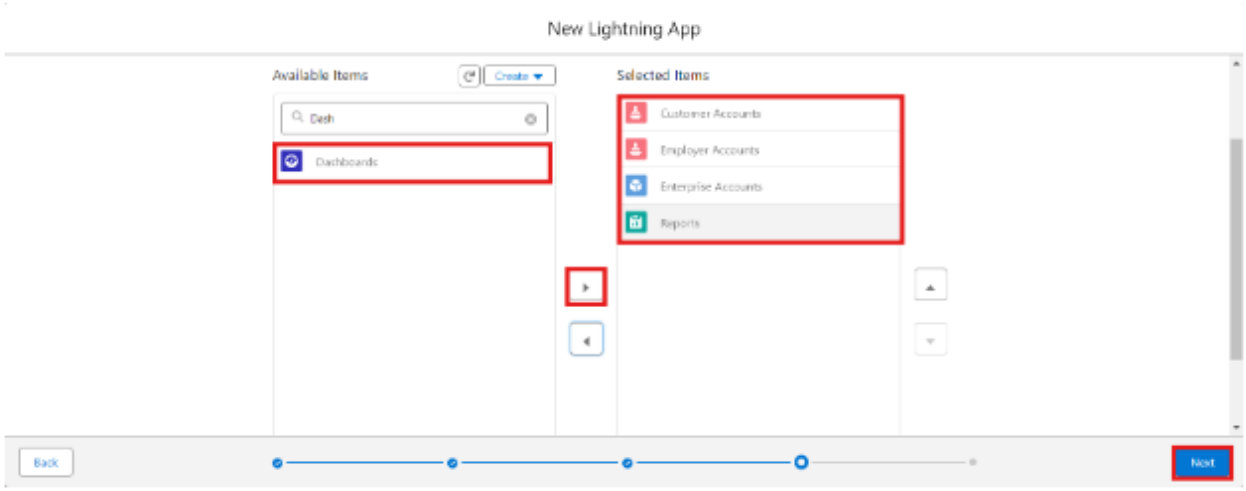

2. Fill the app name in app details and branding as follow
App Name : TheChaiShop&Co
Developer Name : Auto Populates
Add image optional (if you want to give any image you can otherwise not mandatory) - Add Primary color Hex or leave it to default.
Then click Next.

3. In App options
Navigation style : Standard navigation
Setup experience : setup
Supporters form factors : Desktop and phone
Then click Next

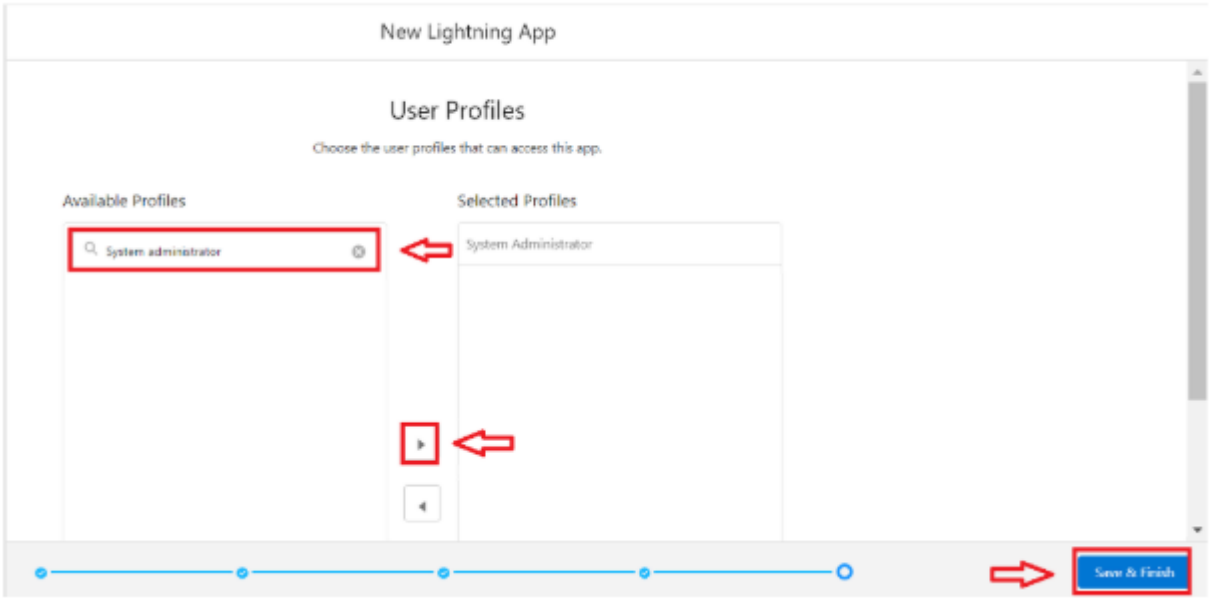

4. In Utility items
Utility Bar alignment : Default
Then click Next.

5. Navigation items
Select the created Custom Objects and required standard objects
● Customer Accounts
Employer Accounts
Enterprise Accounts
Reports
Dashboards

CamScanner

6. To Add User Profiles : System Administrator

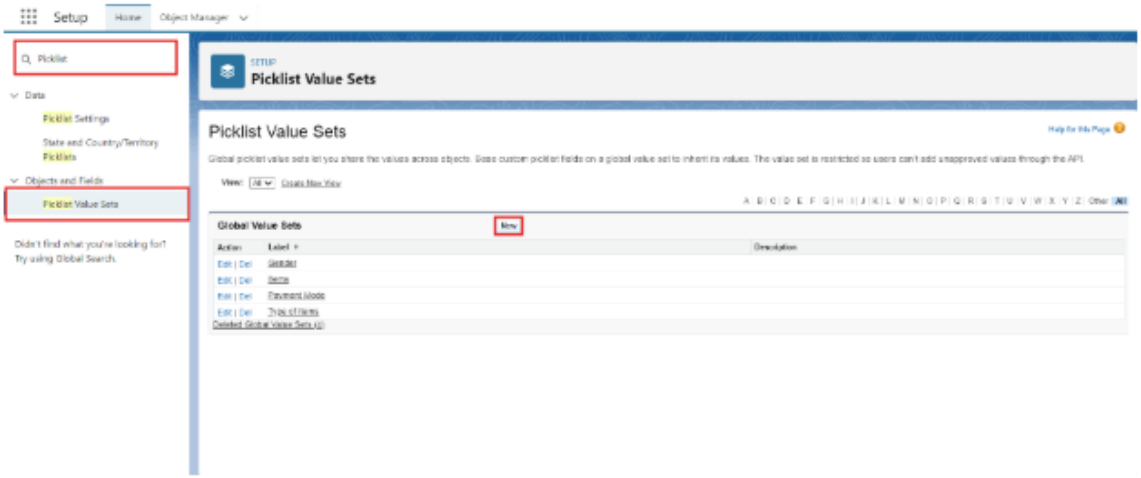

7. Click Save & Finish.

Milestone 5 : Global Picklist

Activity 1 : Create Global Picklist

1. In Quick find box search for : Picklist value sets and click New.

CamScanner

- Label : Gender
  Name : Auto Populates
  Values : Male
  Female
  Others

Click Save & New.

2. Create three more Global picklists following the same steps.

- Label : Items
  Name : Auto populates
  Values : Platinum Tea Powder

Double Delight Tea Powder
Super Dust Tea Powder
Osmania Biscuits (Value Pack)
Osmania Biscuits (Premium Pack)
Dry Fruit Biscuits
Fruit Biscuit
Salt Biscuits
Multigrain Biscuits
Ragi Biscuits
Double Choco Chip Cookies

CamScanner

Butter Almond Cookies
Melting Moments Cookies
Honey Oats Cookies
Delight Box
Signature Box
Assorted Box
Click Save & New.
● Label : Payment Mode
Name : Auto populates
Values : Gpay
PhonePe
Paytm
Credit or Debit card
Cash.
Click Save & New.
● Label : Type of Items
Name : Auto populates
Values : Tea powder
Cookies
Gift Hampers
Click Save.

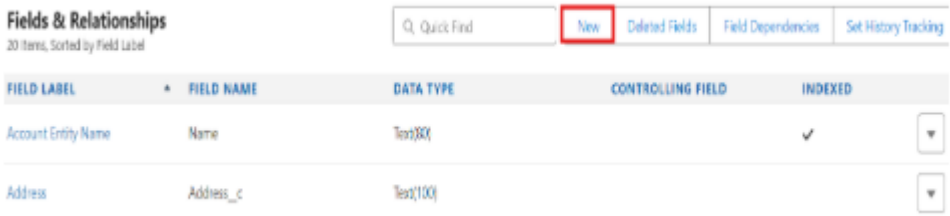

Milestone 6 : Fields & Relationships

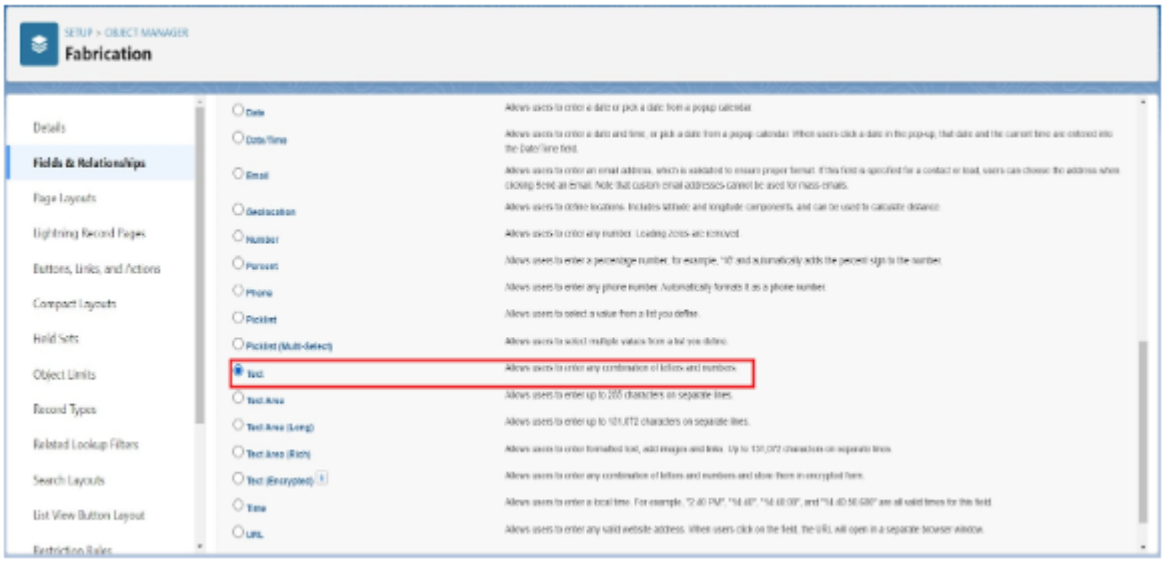

Activity 1 : Create Custom fields for Employer Account

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.
2. Click the Object Manager tab. If you don’t see it, enter Object Manager in the Quick Find box.
3. From the object manager page, In the Quick Find box, Search for the custom object you just created : Employer Account
4. From the sidebar, click Fields & Relationships. Notice that there are already some fields there. Those are the standard fields.
5. Click New to create a custom field. Tip: Before creating a new field, do a quick search to make sure a similar one doesn’t already exist.

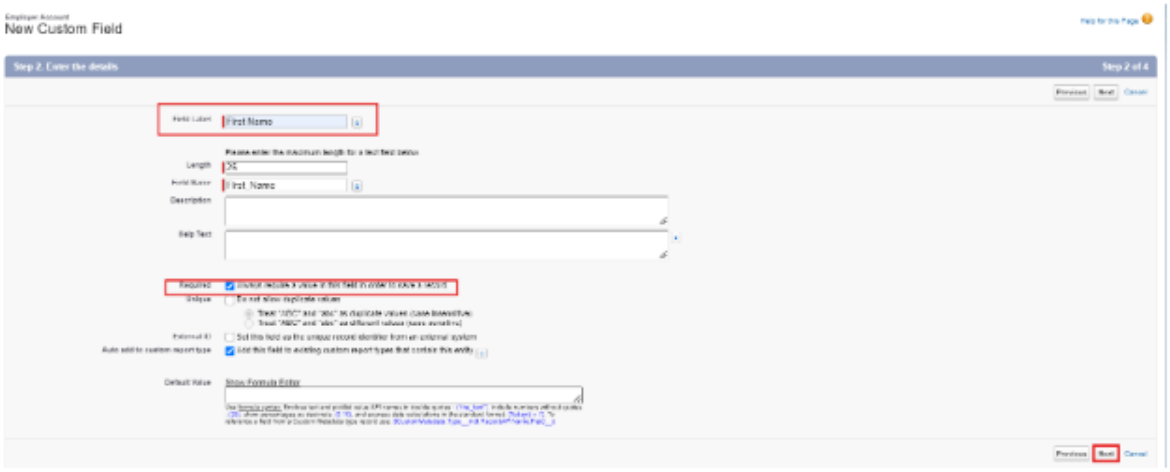

CamScanner

6. Next, choose a data type as Text. Choosing a data type helps you format the field input.

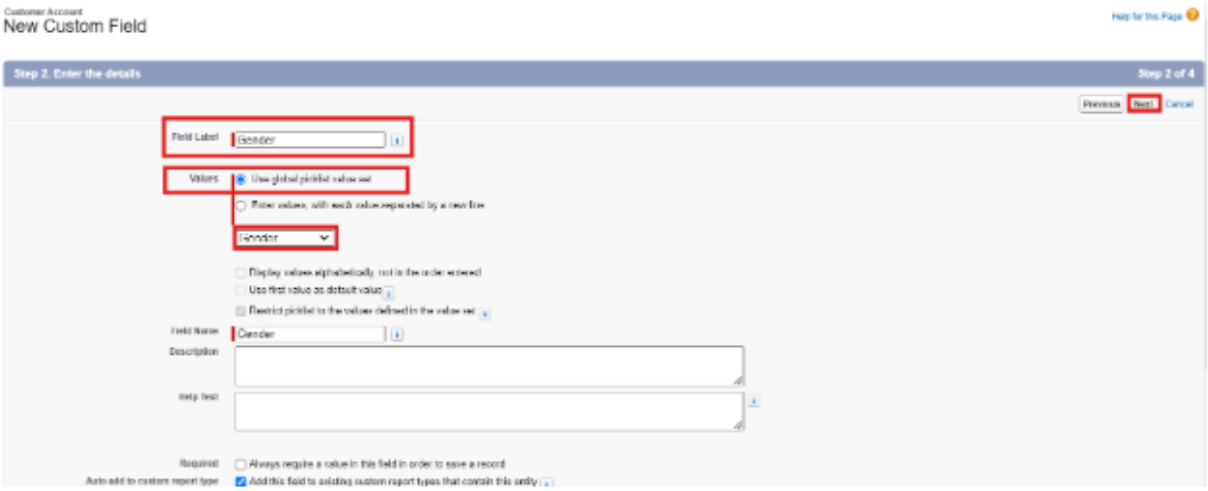

7. Click on next.

8. Data Type : Text
Field Label: First Name
Field Name : Auto Populates
Length : 25
Required : Check the box
Click on Next → Next → Save and new.
9. Repeat the Same steps for remaining fields

CamScanner

● Data Type : Text
Field Label: Last Name
Field Name : Auto Populates
Length : 25
Required : Check the box
Click on Next → Next → Save and new.
● Data Type : PickList
Field Label: Gender
Values : Use Global Picklist value set and
select Gender from the dropdown menu.
Field Name : Auto Populates.
Required : Check the box
Click on Next → Next → Save and new.

● Data Type : Phone
Field Label : Phone Number
Field Name : Auto Populates
Required : Check the box
Click on Next → Next → Save and new.
● Data Type : Email
Field Label : Email ID
Field Name : Auto Populates
Required : Check the box
Click on Next → Next → Save and new.
● Data Type : Date
Field Label : Date of Birth
Field Name : Auto Populates
Required : check the box
Click on Next → Next → Save and new.
● Data Type : Text
Field Label : Aadhar Number
Field Name : Auto Populates

CamScanner

Length : 12
Click on Next → Next → Save and new.
● Data Type : Text
Field Label : PAN Details
Field Name : PAN_Details
Length : 10
Click on Next → Next → Save and new.
● Data Type : Picklist
Field Label : Designation
Field Name : Auto Populates
Value : Enter value, with each value separated by a new line.
Manager
Finance and Accounting
Kitchen Staff
Cashier
Servers
Click on Next → Next → Save and new.
● Data Type : Currency
Field Label : Salary
Field Name : Auto Populates
Click on Next → Next → Save.

Activity 2: Create Custom fields for Customer Account

1. Data Type : Text
Field Label: First Name
Field Name : Auto Populates
Length : 25
Required : Check the box
Click on Next → Next → Save and new.
2. Data Type : Text
Field Label: Last Name
Field Name : Auto Populates
Length : 25
Required : Check the box
Click on Next → Next → Save and new.
3. Data Type : PickList
Field Label: Gender
Values : Use Global Picklist value set and
select Gender from the dropdown menu.
Field Name : Auto Populates.
Required : Check the box
Click on Next → Next → Save and new.
4. Data Type : Phone
Field Label : Phone Number
Field Name : Auto Populates
Required : Check the box

CamScanner

Click on Next → Next → Save and new.
5. Data Type : Date
Field Label : Date of Birth
Field Name : Auto Populates
Required : check the box
Click on Next → Next → Save and new.
6. Data Type : Formula
Field Label : Date of Birthday is today ?
Field Name : Auto Populates
Formula Return : Checkbox
Formula :

IF(

AND(

DAY(TODAY()) = DAY(Date_of_Birth__c) ,
MONTH (TODAY()) = MONTH(Date_of_Birth__c)),

TRUE,

FALSE)

Click on Next → Next → Save and new.

10. Data Type : Picklist

Field Label : Payment Mode
Values : Use Global Picklist value set and
select Payment Mode from the dropdown menu.
Field Name : Auto Populates.
Required : Check the box
Click on Next → Next → Save.

Milestone 7 : Page Layouts

For the personalized field view in Customer Accounts, let's create two page layouts Online orders and Walk-In orders.

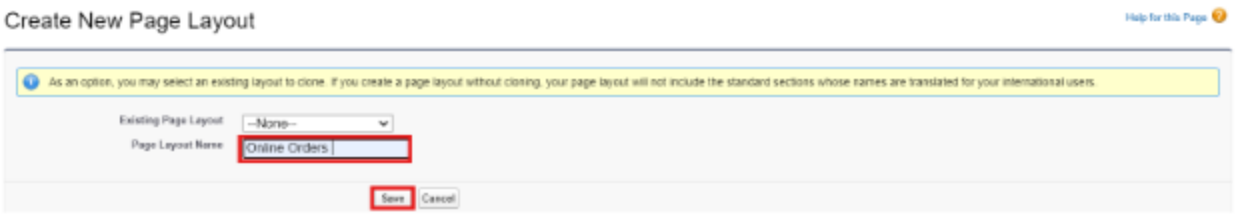

Activity 1: Online Orders page layout

1. Go to the setup page → click on object manager → From drop down click edit for Customer Account object.
2. Click on the Page Layouts → click New.

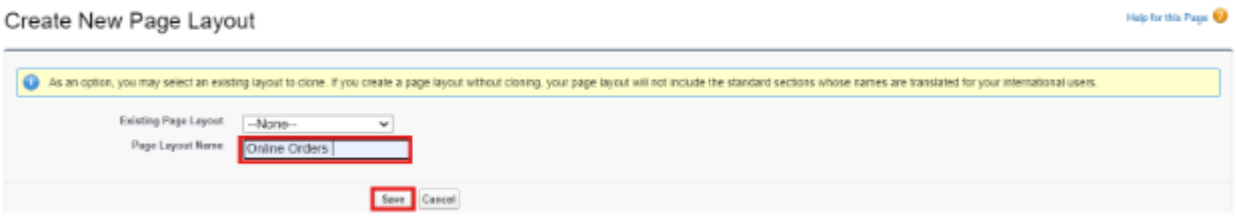

CamScanner

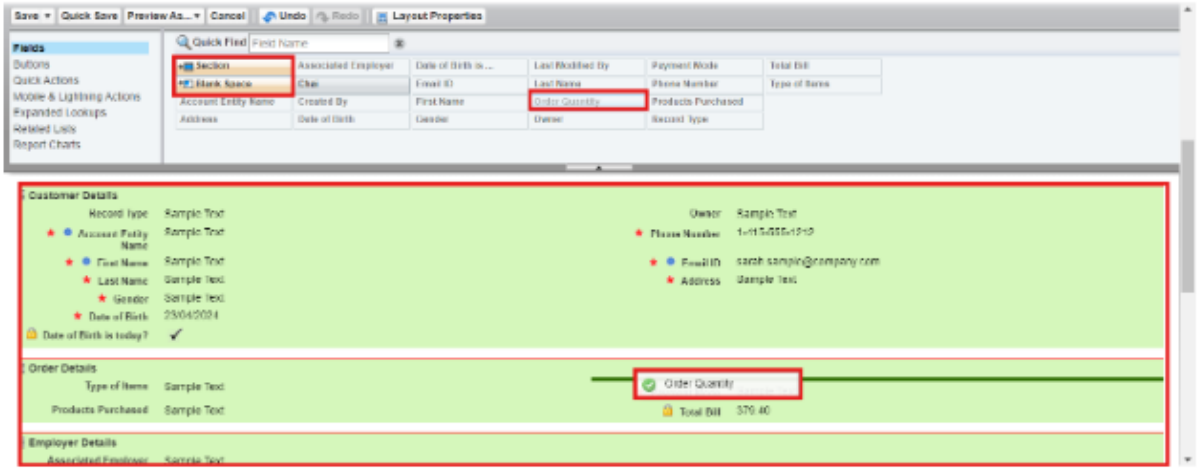

3. Page Layout Name : Online Orders and click Save.

3. Page Layout Name : Online Orders and click Save.

4. Drag and Arrange all the required fields as shown below.

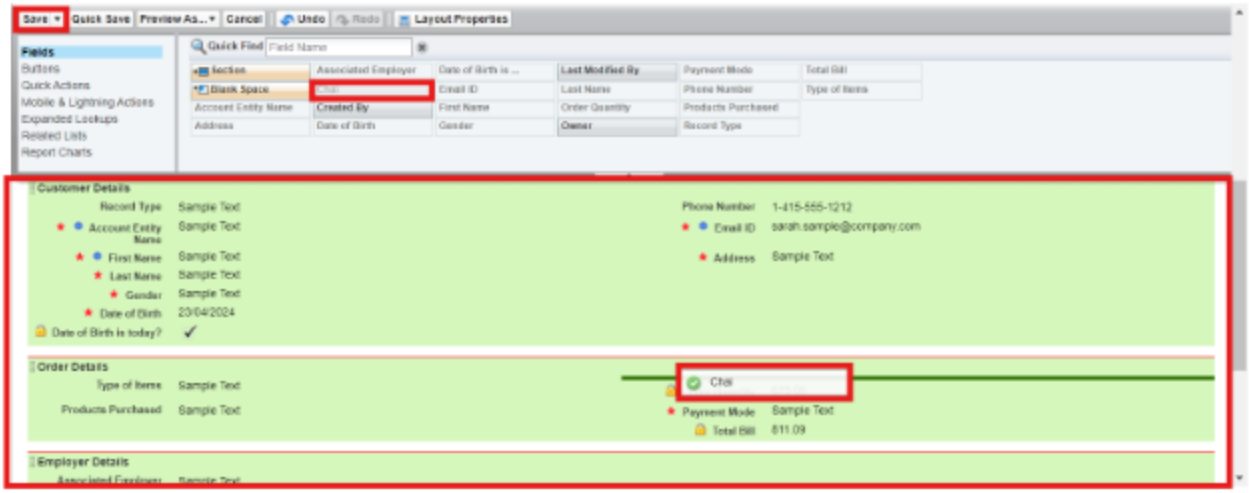

5. Click Save.

Activity 2: Walk-In Orders page layout

1. Go to the setup page → click on object manager → From drop down click edit for Customer Account object.
2. Click on the Page Layouts → click New.
3. Page Layout Name : Walk-In orders and click save.
4. Drag and Arrange all the required fields as shown below.

CamScanner

5. Click Save

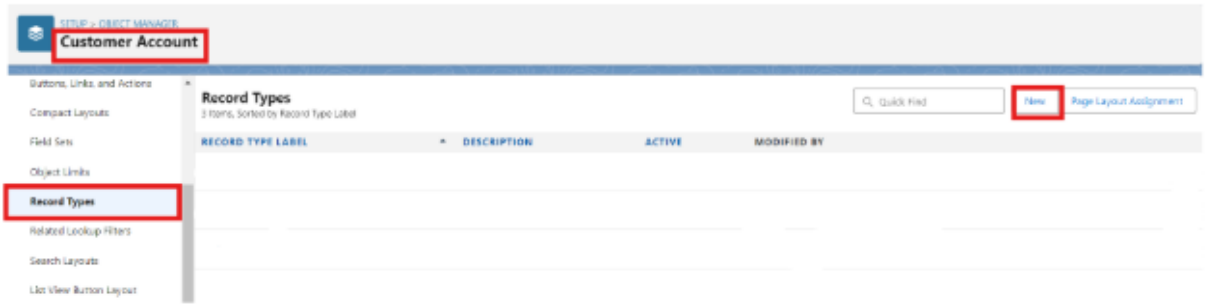

.

Milestone 8 - Record Types

To Differentiate the records and data stored in Customer Accounts, let's create two different Record Types.
Online orders and Walk-In orders.

Activity 1: Online Orders Record Type

1. Go to the setup page → click on object manager → From drop down click edit for Customer Account object.
2. Click on the Record Types → click New.

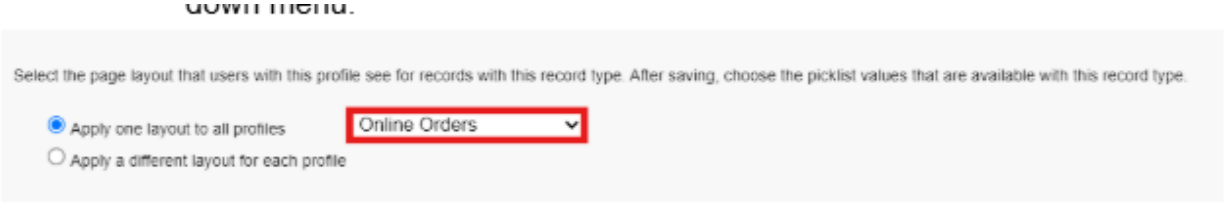

3. Enter Details :
Existing Record Type : Master
Record Type Label : Online Order
Record Type Name : Auto Populates
Active : Tick the checkbox
Click Next

CamScanner

4. In Assign Page Layouts

● Select Apply one layout to all profiles : select Online orders from the drop down menu.

5. Click Save and New.

Activity 2: Walk-In Orders Record Type

1. Go to the setup page → click on object manager → From drop down click edit for Customer Account object.
2. Click on the Record Types → click New.

3. Enter Details :
Existing Record Type : Master
Record Type Label : Walk-In Order
Record Type Name : Auto Populates
Active : Tick the checkbox
Click Next
4. In Assign Page Layouts

● Select Apply one layout to all profiles : select Walk-In orders from the drop down menu.

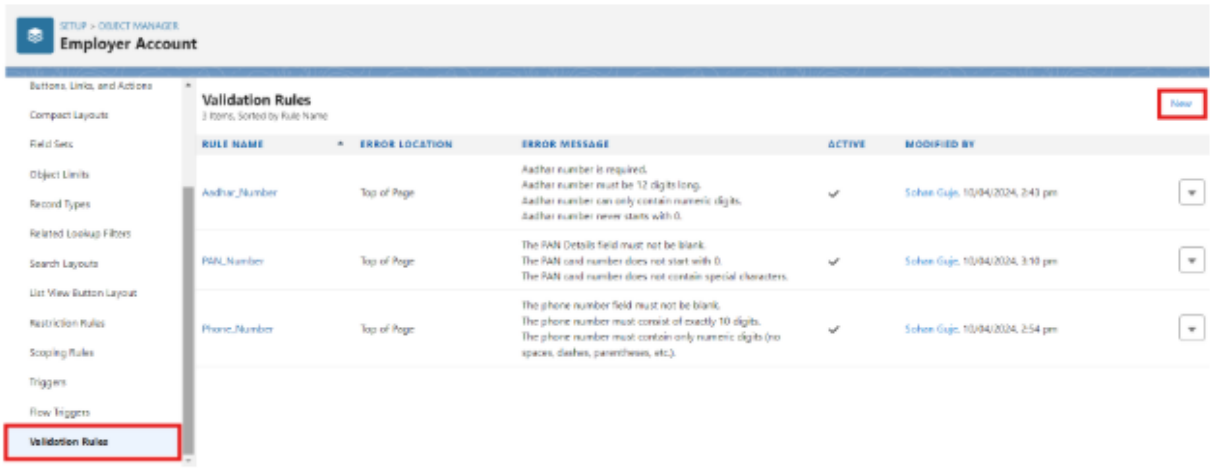

5. Click Save.

Milestone 9 - Validation Rules

Activity 1: On Employer Account

1. Go to the setup page → click on object manager → From drop down click edit for Employer Account object.
2. Click on the validation rule → click New.

CamScanner

3. Enter Rule Name : Aadhar Number

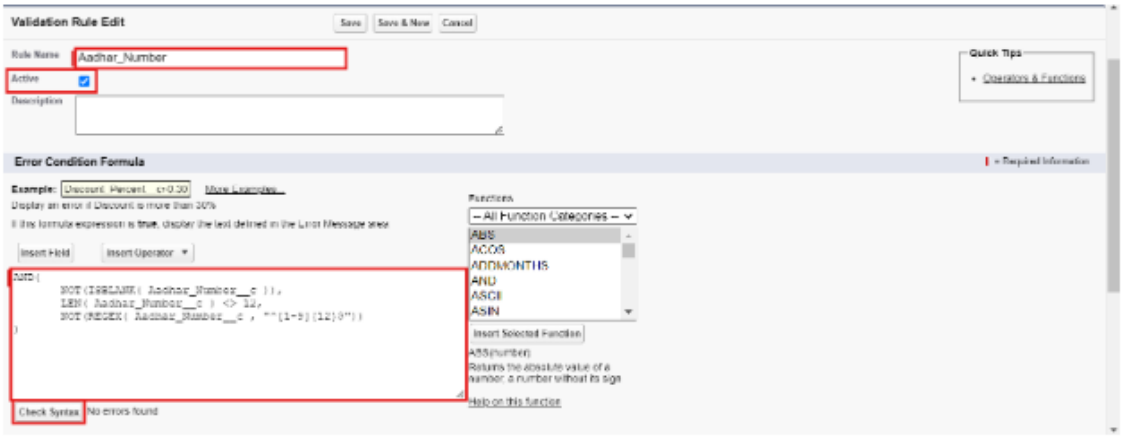

Error Condition Formula :

AND(

NOT(ISBLANK(Aadhar_Number__c)),

LEN(Aadhar_Number__c) <> 12,

NOT(REGEX(Aadhar_Number__c , "^[1-9]{12}$"))

4. Error Message : Aadhar number is required.

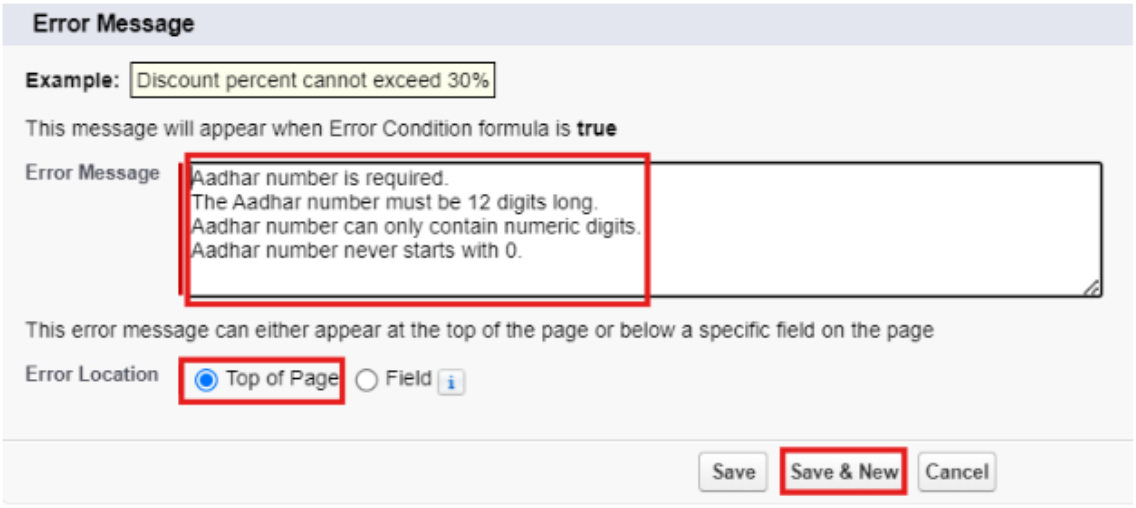

The Aadhar number must be 12 digits long.

Aadhar number can only contain numeric digits.

Aadhar number never starts with 0

CamScanner

5. Click Save & New.

6. Repeat the same steps and create two more validation rules on the employer account object.

● Enter Rule Name : PAN Number

Error Condition Formula :

AND(

NOT(ISBLANK(Phone_Number__c)),
NOT(REGEX(Phone_Number__c , "^[1-9]{10}$")),
NOT(REGEX(Phone_Number__c , "^\\d+$"))
)

Error Message : The PAN Details field must not be blank.
The PAN card number does not start with 0.
The PAN card number does not contain special characters.
Click Save & New.

● Enter Rule Name : Phone Number

Error Condition Formula :

AND(

NOT(ISBLANK(Phone_Number__c)),
NOT(REGEX(Phone_Number__c , "^[1-9]{10}$")),
NOT(REGEX(Phone_Number__c , "^\\d+$"))
)

Error Message :
The phone number field must not be blank.
The phone number must consist of exactly 10 digits.
The phone number must contain only numeric digits
(no spaces, dashes, parentheses, etc.)
Click Save.

Activity 2: On Customer Account

1. Go to the setup page → click on object manager → From drop down click edit for Customer Account object.

CamScanner

2. Click on the validation rule → click New.
3. Enter Rule Name : Phone Number
Error Condition Formula :

AND(

NOT(ISBLANK(Phone_Number__c)),
NOT(REGEX(Phone_Number__c , "^[1-9]{10}$")),
NOT(REGEX(Phone_Number__c , "^\\d+$"))
)
Error Message :
The phone number field must not be blank.
The phone number must consist of exactly 10 digits.
The phone number must contain only numeric digits
(no spaces, dashes, parentheses, etc.)
4. Click Save.

Activity 3: On Enterprise Account

1. Go to the setup page → click on object manager → From drop down click edit for Customer Account object.
2. Click on the validation rule → click New.
3. Enter Rule Name : Phone Number
Error Condition Formula :

AND(

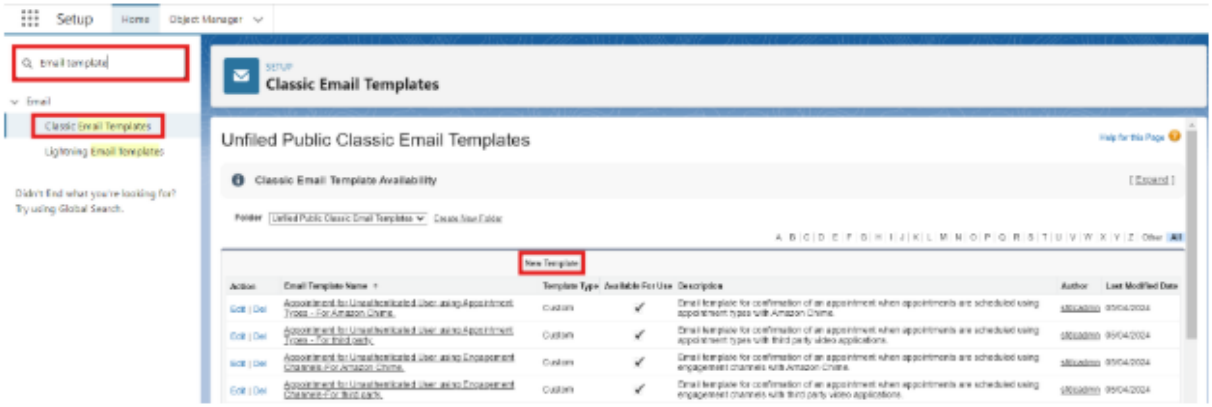

NOT(ISBLANK(Phone_Number__c)),
NOT(REGEX(Phone_Number__c , "^[1-9]{10}$")),
NOT(REGEX(Phone_Number__c , "^\\d+$"))
)
Error Message :
The phone number field must not be blank.
The phone number must consist of exactly 10 digits.
The phone number must contain only numeric digits
(no spaces, dashes, parentheses, etc.)
4. Click Save.

Milestone 10 - Email Template

Activity 1: Email Template

1. Go to setup, In quick find box enter Email template → click on classic Email Template.
2. Click on→ New Email Template
3. Choose the type of email template you would like to create : Text and click Next.

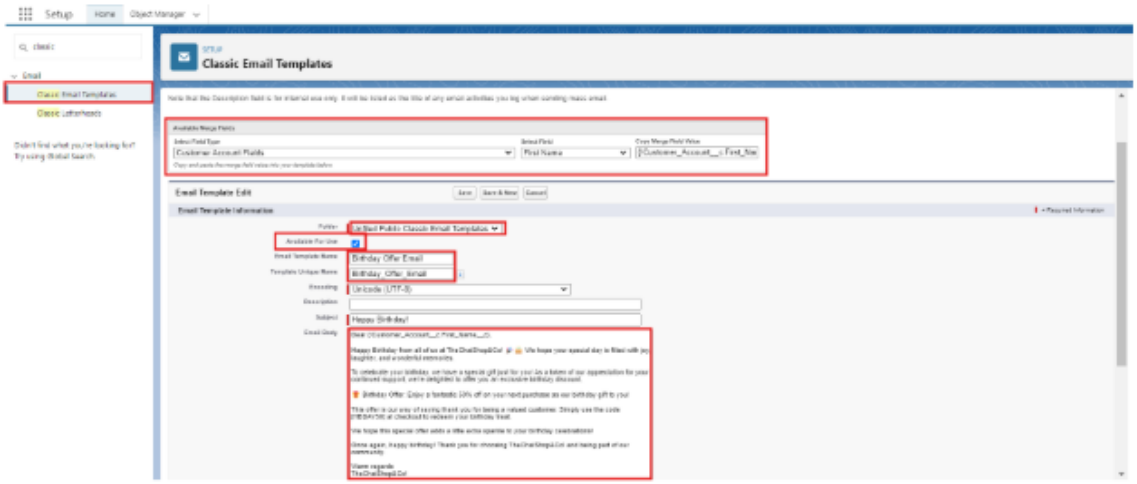

CamScanner

● Available Merge Fields
Select Field Type : Customer Accounts Fields
Select Field : First Name
Copy Merge Field value : Auto Populates, Copy the value and paste it in the email body where required.
4. Folder : Unfiled public Classic Email templates
5. Click on available for use
6. Email Template Name is “Birthday Offer Email”
7. Template Unique Name : Auto populated
8. Subject : Special Birthday Offer Inside!
9. Email body :
Dear {!Customer_Account__c.First_Name__c},
Happy Birthday from all of us at TheChaiShop&Co! 🎉🎂 We hope your special day is filled with joy, laughter, and wonderful memories.

Drag and Drop all the required Columns from the Outline pane.
Group Rows : Search and Select
Type of Items.
7.Click Add Chart on the top.

CamScanner

8. Click Save on the top right.

a. Enter

b. Report Name : Enterprise Account Sales Report

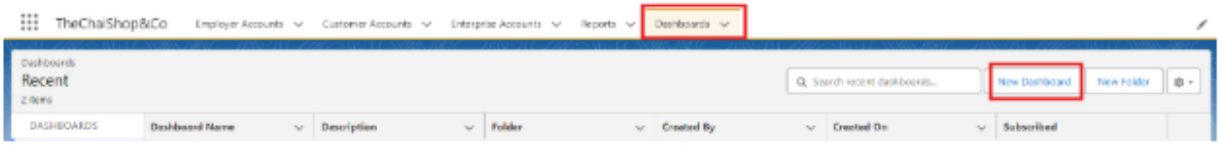

c. Report Unique Name : Auto Populates

d. Click Save.

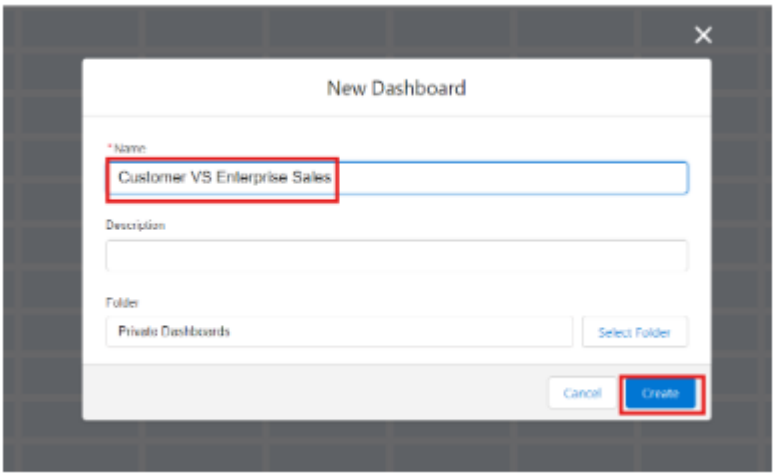

Activity 3: Dashboard

1. Click Dashboards
2. Click New Dashboards

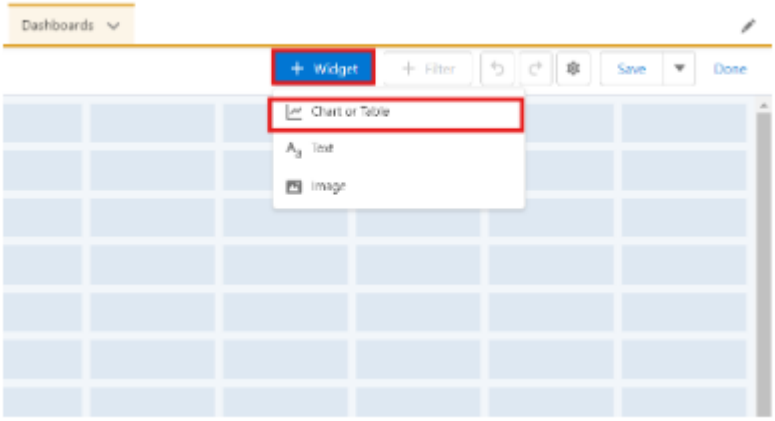

3. Name : Customer Vs Enterprise Sales
4. Click Create.

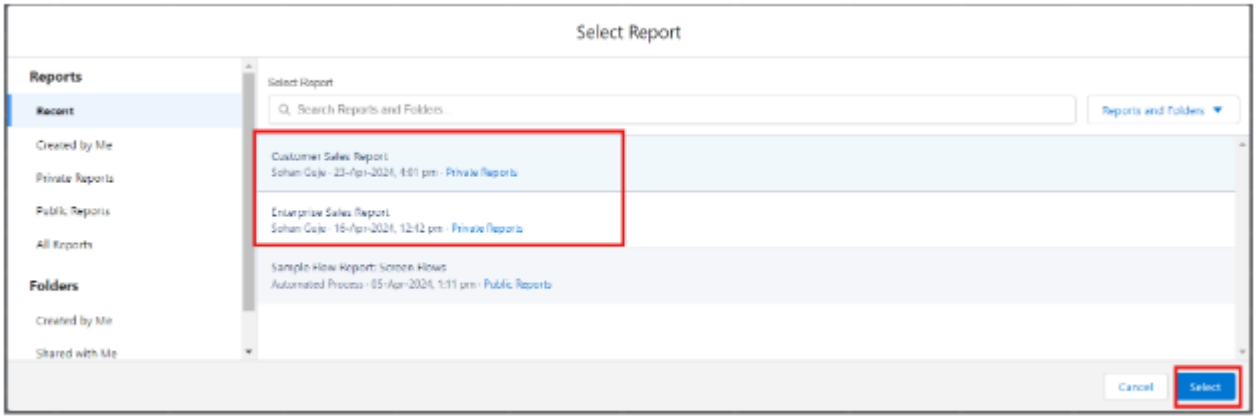

CamScanner

5. Click Widget
6. Select Chart or Table.

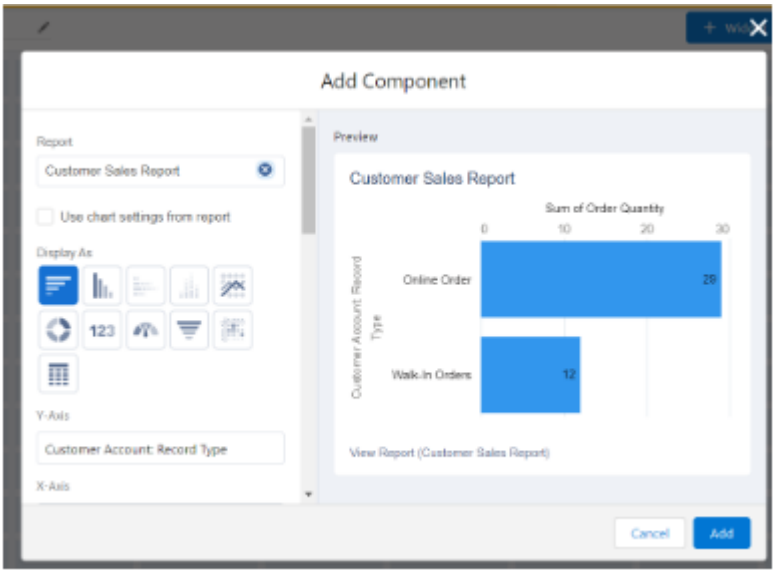

7.Select Customer Account Sales Report

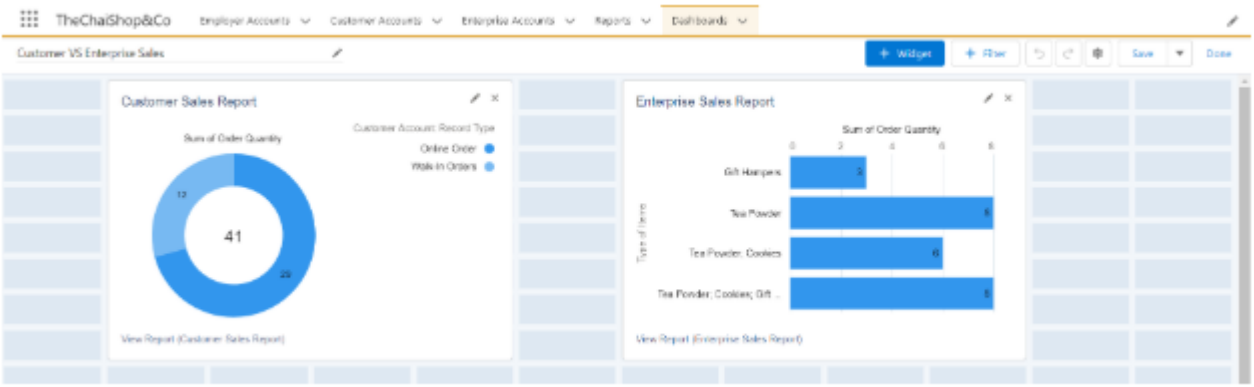

8. Display As : Select the one which you feel comfortable with.
9. Click Add.

CamScanner

10. Repeat the same steps for the Enterprise Account Sales Report.

11. Click Save.

Milestone 12 - Conclusion

In conclusion, the development of TheChaiShop&Co CRM application marks a significant stride in enhancing the store's operational efficiency and customer relationship management capabilities. Seamlessly integrating employer details, customer information (both online and offline), and enterprise data, this application streamlines business processes and enables informed decision-making. The automation of sales calculations, including order quantity and total bill amount, reduces errors and empowers employees to focus on delivering exceptional service. Moreover, automated email notifications for customers' birthdays foster personalized communication and enhance customer engagement.

7. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the Salesforce Lightning interface to verify correct system behavior. These include:

● Record creation for Employer, Customer, and Enterprise objects

CamScanner

● Validation rule testing for Aadhar, PAN, and phone numbers
● Verification of record types and page layouts
● Formula field validation for order quantity and billing
● Flow execution for birthday email alerts
● Report and dashboard generation

Performance testing ensured fast response time and system stability during concurrent usage.

8. ADVANTAGES & DISADVANTAGES

Advantages

● Centralized data management
● Reduced manual work
● Automated calculations
● Improved customer engagement
● Real-time analytics

Disadvantages

● Requires Salesforce license
● Internet dependency
● Limited offline access

9. Conclusion:

The CRM Application for TheChaiShop&Co successfully improves business operations by integrating customer data, automating billing, and enabling intelligent reporting. The system reduces errors, saves time, and enhances customer relationships through automation and analytics.

10. FUTURE SCOPE

● Mobile CRM integration
● AI-based sales prediction
● WhatsApp/SMS alerts
● Inventory management
● Multi-branch support
● Advanced customer profiling
